EDUCATION

DCT Academy MERN Stack Trainee	2019 to 2020
LNCTS(RGPV) BE	2014 to 2018

SUMMARY

Full Stack Web Developer responsible for end-to-end web app development, researching, designing, implementing, and maintaining software projects. Passionate about building stuff from scratch and an expert in JavaScript, I am determined to help clients and organizations find solutions and achieve their desired outcomes.

EMPLOYMENT

HYPERBEANS
Junior Software Engineer   June 2020 to Current

I have consulted and helped the organization by using modern JavaScript, agile methods, and continuous delivery. At Hyperbeans I have:
- Developed Projects in MERN Stack, also used Graphql, Relay, and Redux.
- Touched areas like AWS, Docker, SEO.
- Consulted for a tech company as they move to a SPA architecture
- Performed code reviews on Hperbeans internal projects
- Developed web and mobile applications using React
- Worked daily with clients to better understand project requirements

PROJECTS

PET APPLICATION
Pet-Application is a full Stack MERN Application. It is a platform for pet lovers. It provides good opportunity for pet owners to search for people who can take their pets for walking/refreshment, and it also provides good opportunity for pet lovers to hang out with various awesome pets.
github.com/yashjais/Pet-Application

TICKET MASTER
Ticket Master is an application which provides an interface through which a user can generate tickets. A ticket is generated when a customer have a complain about a certain service, then that ticket can be assigned to a employer based on the department and a priority can be given based on the urgency of the matter.
github.com/yashjais/Ticket-Master

NOTES APPLICATION
Easy-to-Use, fast, elegant and secure Notes Application. Made using React-Redux, this app lets you save the tasks and particular categories associated to it. The Back-End is made using Node-Express. And the database used is Mongo-Db. The designing tools used in this app are bootstrap and reactstrap.
